

Tablet Options for the Operator Data Interface (ODI)

Shop Floor Data Interface with Scytec DataXchange ODI

A simple, easy to use interface for shop floor operators is crucial for ensuring manufacturers success in tracking downtime reasons and current status information for their equipment. The Scytec DataXchange ODI desktop and mobile application offers a variety of functions, including entering data such as downtimes, part numbers, updating OEE dashboards, and sending emails and text messages. Scytec DataXchange ODI can be run on Apple iOS, Google Android, and Microsoft Windows tablets.

Tablet costs can fit any budget and range from \$250 to \$500 dollars. Common options include...

- Apple iPad 10.2 - 64 GB
- Samsung Galaxy Tab A8 - 32 GB
- Microsoft Surface Go 3 - 64 GB

Protection and Mounting Options

Two common options for tablet mounts and enclosures are **The Joy Factory**, which makes solidly constructed, universal tablet housings or **Vidabox** who offers models for specific tablets and is protected by a full tablet enclosure. With both types of enclosures, you have a myriad of options of how you can mount them to your shop floor equipment. Options include floor stands, wall, and table mounts. Just like Scytec DataXchange itself, your options are endlessly customizable and suited to your shop floor!
